The screenshot displays a web browser window with the URL `localhost:4000/finalproj_76/create`. The page contains a form titled "Add movie" with the following fields: "Id:", "Name:", "length:", "Remote\_url:", and "local\_url:". An "Add" button is located at the bottom of the form.

Below the browser window, the pgAdmin 4 interface is shown. The "Query Editor" tab is active, displaying the following SQL query:

```
1 SELECT * FROM public.finalproj_76
2 ORDER BY id ASC
```

The "Data Output" tab shows the results of the query, which are displayed in a table with the following columns: "id", "name", "length", "remote\_url", and "local\_url". The table contains 6 rows of data:
